

ISO/IEC 27001 Annex A Control Mapping

Asset: kiranregmi.com

Owner: Kiran Regmi

Purpose: High-level control alignment (non-certified)

A.5 — Organizational Controls

Security ownership, roles, responsibilities, and governance processes are defined through documented security plans and review practices.

A.6 — People Controls

Security awareness, acceptable use expectations, and responsibility for platform security are established through ownership and documentation.

A.7 — Physical Controls

Physical infrastructure security is inherited from managed hosting providers and considered out of scope for direct implementation.

A.8 — Technological Controls

Authentication controls, access management, secure application design, logging, and recovery mechanisms are implemented or planned.

ISO 27001 Alignment Summary

ISO Annex A Domain	Alignment Status	Notes
A.5 Organizational	Aligned	Security governance documented
A.6 People	Aligned	Security ownership and responsibility defined
A.7 Physical	Inherited	Managed hosting provider
A.8 Technological	Partial	Controls implemented with roadmap

This mapping demonstrates alignment to ISO/IEC 27001 Annex A controls for governance, risk management, and application security. This does not represent certification or formal compliance.
